3rd Wrist Surgery Course With Live Surgery

WRIST TRAUMA: FROM THE BASE TO THE PEAK

Dear Colleagues,

It's a pleasure for me to introduce the third edition of the WIB course, during this appointment we would like to develop indications and treatment of common wrist pathologies, from the most simple conditions to more complex ones.

During these two days we will have the possibility to develop the theoretic part on Thursday and complete the topic on Friday with live open and arthroscopic surgery. The first 50 registered participants will be admitted.

We hope to see you in Brescia for this productive symposium.

CME credits for the following Health Care Providers: Orthopaedic Surgeons and Plastic and Reconstructive Surgeons.

The official languages are English and Italian.

Best regards

Dr Alberto Sgarbossa
